Author Index Volume 144 (2004)

- Anthony, M., E. Boros, P.L. Hammer and A. Kogan, Introduction to special volume of Discrete Applied Mathematics (1–2) 1–1
- Anthony, M., On data classification by iterative linear partitioning (1–2) 2–16
- Anthony, M., Some connections between learning and optimization (1–2) 17–26
- Bernasconi, A., see V. Ciriani (3) 263–269
- Berry, A. and A. Sigayret, Representing a concept lattice by a graph (1–2) 27–42
- Biedl, T., T. Chan, E.D. Demaine, R. Fleischer, M. Golin, J.A. King and J.I. Munro, Fun-Sort—or the chaos of unordered binary search (3) 231–236
- Boros, E. and V. Menkov, Exact and approximate discrete optimization algorithms for finding useful disjunctions of categorical predicates in data analysis (1–2) 43–58
- Boros, E., see M. Anthony (1–2) 1–1
- Bruni, R., Discrete models for data imputation (1–2) 59–69
- Castiglione, G., A. Restivo and S. Salemi, Patterns in words and languages (3) 237–246
- Chan, T., see T. Biedl (3) 231–236
- Cicalese, F., L. Gargano and U. Vaccaro, On searching strategies, parallel questions, and delayed answers (3) 247–262
- Ciriani, V., N. Pisanti and A. Bernasconi, Room allocation: a polynomial subcase of the quadratic assignment problem (3) 263–269
- Collberg, C.S. and T.A. Proebsting, Problem identification using program checking (3) 270–280
- Crescenzi, P., F. Montecalvo and G. Rossi, Optimal covering designs: complexity results and new bounds (3) 281–290
- Del Lungo, A., M. Nivat, R. Pinzani and S. Rinaldi, A bijection for the total area of parallelogram polyominoes (3) 291–302
- Demaine, E.D., see T. Biedl (3) 231–236
- Deogun, J.S. and J. Saquer, Monotone concepts for formal concept analysis (1–2) 70–78
- Fleischer, R., see T. Biedl (3) 231–236
- Focardi, R. and F.L. Luccio, A modular approach to Sprouts (3) 303–319
- Fraigniaud, P., A note on line broadcast in digraphs under the edge-disjoint paths mode (3) 320–323
- Gargano, L., see F. Cicalese (3) 247–262
- Gervasi, V. and G. Prencipe, Coordination without communication: the case of the flocking problem (3) 324–344
- Golin, M., see T. Biedl (3) 231–236
- Hammer, P.L., A. Kogan, B. Simeone and S. Szedmak, Pareto-optimal patterns in logical analysis of data (1–2) 79–102
- Hammer, P.L., Y. Liu, B. Simeone and S. Szedmak, Saturated systems of homogeneous boxes and the logical analysis of numerical data (1–2) 103–109
- Hammer, P.L., see M. Anthony (1–2) 1–1
- Holzer, M. and W. Holzer, Tantrix™ rotation puzzles are intractable (3) 345–358
- Holzer, W., see M. Holzer (3) 345–358
- Hurtado, F., M. Mora, P.A. Ramos and C. Seara, Separability by two lines and by nearly straight polygonal chains (1–2) 110–122
- Jaroszewicz, S., D.A. Simovici and I. Rosenberg, Measures on Boolean polynomials and their applications in data mining (1–2) 123–139

- Katona, G.O.H. and A. Sali, New type of coding problem motivated by database theory (1–2) 140–148
- King, J.A., see T. Biedl (3) 231–236
- Kogan, A., see M. Anthony (1–2) 1–1
- Kogan, A., see P.L. Hammer (1–2) 79–102
- Laber, E.S. and L.T. Nogueira, On the hardness of the minimum height decision tree problem (1–2) 209–212
- Liu, Y., see P.L. Hammer (1–2) 103–109
- Lodi, E., L. Pagli and N. Santoro, Fun with algorithms (3) 229–230
- Luccio, F.L., see R. Focardi (3) 303–319
- Macula, A.J. and L.J. Popyack, A group testing method for finding patterns in data (1–2) 149–157
- Menkov, V., see E. Boros (1–2) 43–58
- Merlini, D., R. Sprugnoli and M.C. Verri, Waiting patterns for a printer (3) 359–373
- Minoux, M., Polynomial approximation schemes and exact algorithms for optimum curve segmentation problems (1–2) 158–172
- Moan, C. and I. Rusu, Hard problems in similarity searching (1–2) 213–227
- Montecalvo, F., see P. Crescenzi (3) 281–290
- Mora, M., see F. Hurtado (1–2) 110–122
- Morin, P. and J. Morrison, The geometry of carpentry and joinery (3) 374–380
- Morrison, J., see P. Morin (3) 374–380
- Munro, J.I., see T. Biedl (3) 231–236
- Nivat, M., see A. Del Lungo (3) 291–302
- Nogueira, L.T., see E.S. Laber (1–2) 209–212
- Pagli, L., see E. Lodi (3) 229–230
- Pinzani, R., see A. Del Lungo (3) 291–302
- Pisanti, N., see V. Ciriani (3) 263–269
- Popyack, L.J., see A.J. Macula (1–2) 149–157
- Prencipe, G., see V. Gervasi (3) 324–344
- Proebsting, T.A., see C.S. Collberg (3) 270–280
- Ramos, P.A., see F. Hurtado (1–2) 110–122
- Restivo, A., see G. Castiglione (3) 237–246
- Rinaldi, S., see A. Del Lungo (3) 291–302
- Rosenberg, I., see S. Jaroszewicz (1–2) 123–139
- Rossi, G., see P. Crescenzi (3) 281–290
- Rusu, I., see C. Moan (1–2) 213–227
- Salemi, S., see G. Castiglione (3) 237–246
- Sali, A., see G.O.H. Katona (1–2) 140–148
- Santoro, N., see E. Lodi (3) 229–230
- Saquer, J., see J.S. Deogun (1–2) 70–78
- Seara, C., see F. Hurtado (1–2) 110–122
- Shamir, R., R. Sharan and D. Tsur, Cluster graph modification problems (1–2) 173–182
- Sharan, R., see R. Shamir (1–2) 173–182
